## EDUCATION

---

### University of Maryland

*PhD in Information Studies*

College Park, MD

*Aug. 2018 – Aug 2023*

### Indian Institute of Technology (IIT) Guwahati

*Bachelor's in Design*

Guwahati, India

*July. 2011 – May 2015*

## EXPERIENCE

---

### Graduate Research Assistant

Intelligent Assistive Machines (IAM) Lab

*Advisor: Hernisa Kacori*

Jan 2019 – Present

iSchool @ University of Maryland

- Currently, I am investigating how children train machine learning classifiers, called teachable machines, and what design guidelines we can glean from their interactions.
- We explore how children use machine teaching interfaces through three co-design sessions.
- Children elicit designs of novel AI-infused applications, where the end-user can employ machine teaching to personalize their behavior

### Software Engineer and Game Designer

SplashLearn Inc. (Formerly SplashMath)

*Manager: Umang Jain (VP)*

Sept. 2017 – July 2018

India

- For a year, I designed, developed, and tested games for teaching math to children in grades K-5 (first 10 years of school)
- I worked with and led a team of subject matter experts, game designers, game developers, and game artists.

### Research Scientist (Formerly Software Engineer)

Mobile Enabled Industry Solutions, IBM Research India

*Manager: Nitendra Rajput*

July 2015 – August 2017

India

- Using AI technologies in Education and HCI for making math word problems easier to understand for students via their automatic visualizations, improving usability of eye tracking technology, combining eye tracking and affective computing for novel captcha systems.
- Our work with Sesame Street tackles the problem of early childhood vocabulary learning using novel machine learning algorithms.
- These projects resulted in multiple patents and publications in renowned conferences.
